

WEBDEV1 • PRACTICE SHEET

Flexbox Practice — Container Properties

For each numbered challenge, look at the **target layout** rendered below it, then write the HTML structure and the CSS ruleset (on the parent container) that would reproduce it. Only container-level flex properties are tested here — `display`, `flex-direction`, `flex-wrap`, `justify-content`, `align-items`, `align-content`, and `gap`.

How to use this sheet:

1. Study the target box for each numbered item — note spacing, alignment, and direction of the colored items.
2. Write your HTML markup and CSS in the blank area provided (or on paper / your own editor).
3. Test your answer in a code editor or browser, then compare against the hidden solution (click "Reveal Solution" to check).

Name: _____ Section: _____ Date: _____

01

Evenly Spaced Row

tests: `justify-content`

TARGET LAYOUT

Given HTML (do not change):

```
<div class="container">
  <div class="box">1</div>
  <div class="box">2</div>
  <div class="box">3</div>
</div>
```

YOUR CSS FOR .CONTAINER:

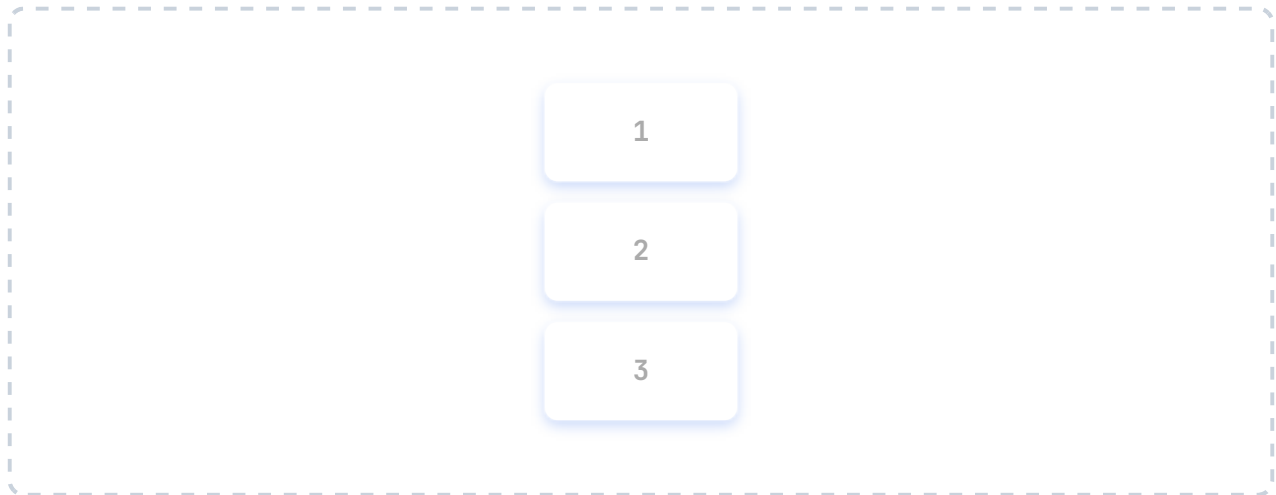

```
.....
.....
.....
.....
```

02

Centered Vertical Stack

tests: flex-direction, justify-content

TARGET LAYOUT

Given HTML (do not change):

```
<div class="container">
  <div class="box">1</div>
  <div class="box">2</div>
  <div class="box">3</div>
</div>
```

YOUR CSS FOR .CONTAINER:

03

Bottom-Aligned Row

tests: align-items

TARGET LAYOUT

Given HTML (do not change):

```
<div class="container">
  <div class="box short">1</div>
  <div class="box tall">2</div>
  <div class="box medium">3</div>
</div>
```

←!— each .box has its own fixed height already set →

YOUR CSS FOR .CONTAINER:

.....

.....

.....

.....

04

Wrapping Card Grid

tests: flex-wrap, gap

TARGET LAYOUT (CONTAINER IS 360PX WIDE)

Given HTML (do not change):

```
<div class="container">
  <div class="card">1</div>
  <div class="card">2</div>
  <div class="card">3</div>
  <div class="card">4</div>
  <div class="card">5</div>
</div>
```

←!— each .card is already fixed at 100px wide —→

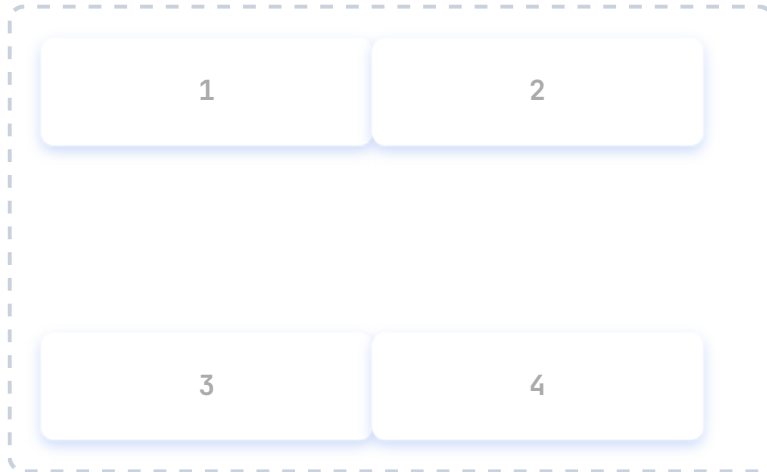

YOUR CSS FOR .CONTAINER:

05

Wrapped Rows, Spaced Apart

tests: flex-wrap, align-content

TARGET LAYOUT (CONTAINER IS 360PX × 220PX)

Given HTML (do not change):

```
<div class="container">
  <div class="card">1</div>
  <div class="card">2</div>
  <div class="card">3</div>
  <div class="card">4</div>
</div>
```

←!— .container is fixed at 360px wide, 220px tall →
←!— each .card is fixed at 155px wide →

YOUR CSS FOR .CONTAINER:

06

Navbar Pattern

tests: justify-content, align-items

TARGET LAYOUT

Given HTML (do not change):

```
<nav class="container">
  <div class="logo">LOGO</div>
  <div class="links">NAV LINKS</div>
  <button class="cta">BTN</button>
</nav>
```

←!— logo, links, and button have different fixed heights already →

YOUR CSS FOR .CONTAINER:

.....

.....

.....

.....

07

Reversed Order Row

tests: flex-direction (reverse)

TARGET LAYOUT — NOTE THE NUMBER ORDER, LEFT TO RIGHT

Given HTML (do not change — note the source order is 1, 2, 3):

```
<div class="container">
  <div class="box">1</div>
  <div class="box">2</div>
  <div class="box">3</div>
</div>
```

YOUR CSS FOR .CONTAINER:

.....

.....

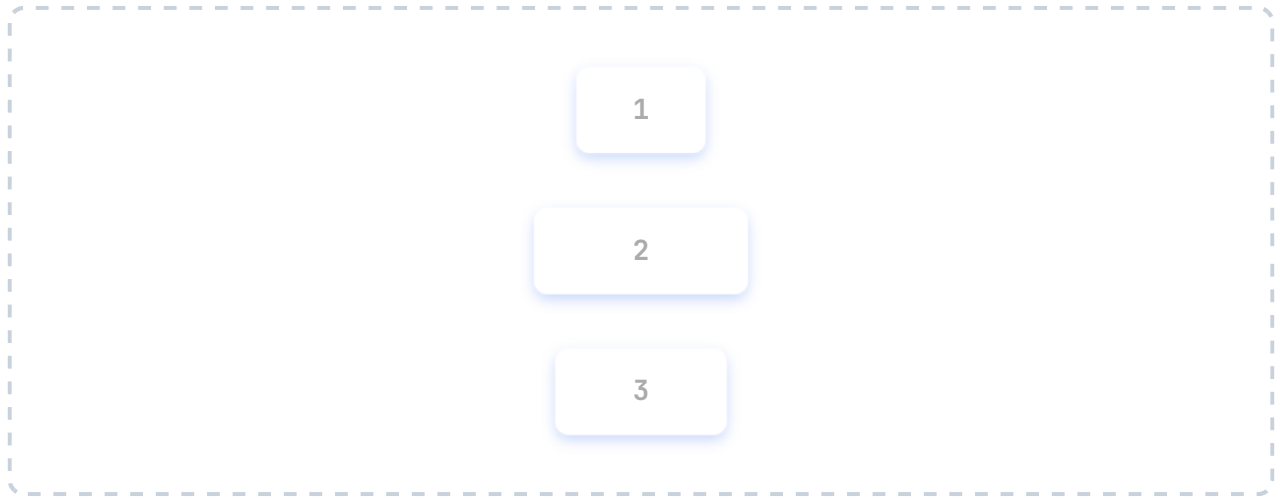

.....

08

Centered Column, Spaced Items

tests: flex-direction, align-items, justify-content

TARGET LAYOUT

Given HTML (do not change):

```
<div class="container">
  <div class="box small">1</div>
  <div class="box wide">2</div>
  <div class="box medium">3</div>
</div>
```

←!— each box already has its own fixed width →

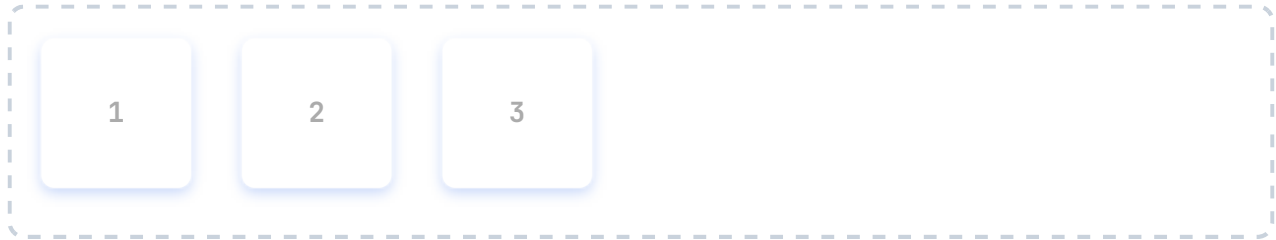

YOUR CSS FOR .CONTAINER:

09

Evenly Gapped Row, Left-Packed

tests: gap

TARGET LAYOUT

Given HTML (do not change):

```
<div class="container">
  <div class="box">1</div>
  <div class="box">2</div>
  <div class="box">3</div>
</div>
```

YOUR CSS FOR .CONTAINER:

```
.....
.....
.....
```

10

Right-Aligned, Top-Packed Wrap

tests: flex-wrap, justify-content, align-content

TARGET LAYOUT (CONTAINER IS 360PX × 200PX)

Given HTML (do not change):

```
<div class="container">
  <div class="card">1</div>
  <div class="card">2</div>
  <div class="card">3</div>
  <div class="card">4</div>
  <div class="card">5</div>
</div>
```

←!— .container is fixed at 360px wide, 200px tall →

←!— each .card is fixed at 90px wide →

YOUR CSS FOR .CONTAINER:

```
// Flexbox Practice Sheet — Container Properties · WEBDEV1 · solutions hidden when  
printed
```
